Take command of your kitchen with a voice-activated faucet that works smarter.

**BEFORE YOU BEGIN:**

Make sure you have a smartphone or tablet and the voice-activated faucet is controlled by a switch.

**NOW LET'S GET STARTED.**

1. **STEP 1:** Review the installation instructions prior to installing your Delta VoiceIQ™ Module. You will also need a smartphone or tablet and the following to complete the setup:

   - A Wi-Fi network
   - A smartphone or tablet
   - The VoiceIQ™ Module
   - A power source

2. **STEP 2:** Before you begin, remove the batteries from the battery pack of your Delta Touch2O® faucet.

3. **STEP 3:** Visit device.deltafaucet.com URL 10.10.10.1 for product setup. Follow the steps on screen.

4. **STEP 4:** Connect your smartphone or tablet to your VoiceIQ™ Module's Wi-Fi signal, "Delta-ABC." Your VoiceIQ™ Module will have a unique identifier in the Wi-Fi Module’s Wi-Fi signal, "Delta-ABC." Your VoiceIQ™ Module will have a unique identifier in the Wi-Fi network name, shown here as "ABC."

5. **STEP 5:** Connect your smartphone or tablet to the VoiceIQ™ Module setup page, where you can see settings, FAQs, and a list of voice commands.

6. **STEP 6:** If you need installation or troubleshooting assistance, visit DeltaFaucet.com/VoiceIQ.

7. **STEP 7:** If you need installation or troubleshooting assistance, visit DeltaFaucet.com/service-parts/warranty.

8. **STEP 8:** If you can't locate DELTA-ABC on your list of available Wi-Fi networks, check for a network with the same name. If your VoiceIQ™ Module is blinking a red light every 5 seconds, there is an issue with your VoiceIQ™ Module setup.

   - a. If the LED light on your VoiceIQ™ Module is blinking green, it's still in Wi-Fi setup mode. Re-scan for Wi-Fi networks on your mobile device and connect to "Delta-ABC" ("ABC" is used here to mark your module's unique identifier code).
   - b. If the voice module setup page fails to load on your mobile device after entering the LED light on your VoiceIQ™ Module is blinking red, check the following:
     - Double-check that your Wi-Fi password was entered correctly.
     - The VoiceIQ™ Module works with 2.4 GHz Wi-Fi. If your router has both 2.4 GHz and 5.0 GHz, make sure you use 2.4 GHz.

   - c. If your VoiceIQ™ Module is blinking green, re-scan for Wi-Fi networks on your mobile device. If the light is blinking red, your VoiceIQ™ Module is not connected to your garbage disposal switch by plugging something else into the outlet (lamps and other lights work best, but anything that lights up or makes noise when your garbage disposal is running will work), then switching your garbage disposal outlet. If the setup page fails to load after entering 10.10.10.1, check the following:
     - a. If the LED light on your VoiceIQ™ Module is blinking green, it's still in Wi-Fi setup mode. Re-scan for Wi-Fi networks on your mobile device and connect to "Delta-ABC." ("ABC" is used here to mark your module's unique identifier code).
     - b. If the VoiceIQ™ Module setup page fails to load on your mobile device after entering the LED light on your VoiceIQ™ Module is blinking red, check the following:
       - Double-check that your Wi-Fi password was entered correctly.
       - The VoiceIQ™ Module works with 2.4 GHz Wi-Fi. If your router has both 2.4 GHz and 5.0 GHz, make sure you use 2.4 GHz.
