NOTE 1: For optimum performance of this product, we recommend a system pressure between 20 and 80 PSI static. This product will operate up to a maximum of 125 PSI static per ANSI and CSA requirements. However, we do not recommend pressures above 80 PSI. Thermal expansion or leaking pressure reducing valves may require use of expansion tanks or relief valves to ensure your system never exceeds its maximum intended pressure setting.

NOTE 2: Designed for routine 171º F (77ºC) disinfection cycles up to 30 minutes.

COMPLIES WITH:

• ASME A112.18.1/CSA B125.1
• ASME A112.18.2/CSA/B125.2
• Indicates compliance to ICC/ANSI A117.1
• Patented
• Verified compliant with .25% weighted average Pb content regulations.
